The ICO300-83B features a low-power consumption Intel® Celeron processor N3350/N4200, a DDR3L-1866 SO-DIMM slot supporting up to 8 GB of system memory, as well as an extended temperature range of -40°C to +70°C for operation in harsh environments. Additionally, the ICO300-83B is equipped with two full-size PCI Express Mini Card slots, one for an mSATA storage card and the other for 4G/GPRS/Wi-Fi connection - allowing it to be used as an energy-efficient IIoT gateway to provide flexible communication and data transfer functions.

ICO300-83M (ATEX/C1D2)

Oil Refinery Environment
Monitoring

The working environment in oil and gas industry is extremely hazardous. Therefore, it is essential to have a reliable and accurate monitoring system which can constantly monitor the facility's conditions while collecting and transmitting data to remote sites. Axiomtek's ICO300-83M is an ideal gateway solution and has been certified with ATEX and C1D2 for use in harsh environments where ignitable concentrations of flammable gases, vapors or liquids might exist. It supports the dual-core Intel® Atom™ processor E3930 along with DDR3L system memory, and has six isolated RS-232/422/485 ports, three isolated 10/100/1000Mbps Ethernet ports, and one isolated DIO (8-IN/8-OUT) port. The ICO300-83M also support 5G connectivity as a next generation wireless gateway. Moreover, we also provide secure mounting for customers to easily install the system on a DIN-rail mount or in an enclosure box.

ICO120-83D

Electric Vehicle
Charging Infrastructure
Management

The rise of environmental awareness has led to the fast growing popularity of electric vehicles (EV) all over the world. The numbers of EV charging stations are steadily increasing on a daily basis. The biggest challenge in centralized management is how to control and maintain these unmanned stations remotely. The ICO120-83D is powered by the Intel® Celeron® processor N3350/N4200 and has a DDR3L-1866 SO-DIMM slot holding up to 8 GB of system memory. Additionally, it is equipped with one full-size PCI Express Mini Card slot, one half-size PCI Express Mini Card slot in support of mSATA, and one SIM socket to provide flexible extension capability for customers to achieve remote and real time control without incurring additional labor costs.

ICO300

Industrial Utility Control
Management

Having efficient utility management for factories and plants helps to increase productivity and reduce operational cost. This can be accomplished through the implementation of automated control HVAC, utility consumption monitoring, as well as lighting and access control systems. The high-performance ICO300 can be used to collect the information generated by sensors and wireless modules to prevent system failures. The ICO300 supports the low power Intel® Atom™ processor E3815 (1.46 GHz) and DDR3L system memory maximum up to 4GB. It also features four RS-232/422/485 ports, two isolated Gigabit Ethernet ports, and two high-speed USB 2.0 ports. This intelligent IIoT gateway system provides a perfect solution for IIoT & M2M, industrial and embedded applications.

Industrial Cybersecurity

As we enter the era of IoT (Internet of Things), cyberattacks in industrial appliances are also on the rise. Cybersecurity has become a central concern amongst industrial automation and control system users and vendors. While IoT brings tremendous convenience and valuable insights to help optimize business operations, fast-growing numbers of connected devices also create possible vulnerabilities where data could be stolen or misused. As enterprises strive to regulate their increasingly complex networks, the ability to ensure cybersecurity compliance and data protection has never been more important. Axiomtek provides a wide range of network appliances featuring low power, fanless and slim form factor design as well as noiseless operation, delivering exceptional performance for versatile security gateway applications.

iNA100

Rugged Ethernet Gateway for
Non-Stop Data Center Security

The iNA100 is a DIN-rail industrial-grade network appliance powered by the Intel® Atom® processor x5-E3930. It has one DDR3L-1866 SO-DIMM slot for up to 8GB of non-ECC/ECC memory. This fanless IIoT edge computing platform enables a wide array of uCPE (Universal Customer Premises Equipment) applications, including VPN, firewall, gateway, SD-WAN and vCPE. The iNA100 enables enterprises to strengthen the security of their networks against emerging threats, from the data center to the edge.

NA347

Security Gateway
for Small and
Home Offices

A surge in work-from-home activity due to the COVID-19 pandemic has brought many security issues for small and home office users. The NA347 security gateway is ideal for installation into narrow, space-constraint environments, for instance, the open-plan office or business with a small workplace. This ultra-small desktop network appliance is powered by the Intel® Celeron® processor N3350. It also offers one full-size PCI Express Mini Card slot with PCIe/USB signal support and one Nano SIM socket for expansion interfaces.

Introduction

The 10.4-inch GOT810-845 is specially designed for food processing applications. Its IP66-rated stainless steel housing protects entire system from damage of water, powder and dust. It also supports a wide operating temperature range from -10°C to +50°C. Thus, this robust unit is specifically designed for high humidity, dusty or wet spaces in food factories or kitchens and more harsh applications.

Full IP66 and IP69K Compliance

The GOT810-845 adopts a water/dust-proof housing design with five IP66-rated M12 I/O connectors and IP69K compliance that ensures the product's ability to resist ingress of high temperature and high pressure water. It passed entire system IP66 test by SGS, and verified salt mist test. Additionally, it was tested by a spray nozzle with high temperature water (+80°C), a flow rate of 14 to 16 L/min and a nozzle hold with distance 10 to 15 cm away from the device at angles of 0°, 30°, 60° and 90° for 30 seconds. The GOT810-845 is qualified to meet harsh environment applications.

Wide Temperature (-10°C to +50°C) & Anti-vibration (2G) Design

The GOT810-845 featuring fanless and noiseless design supports a wide operating temperature range from -10°C to +50°C. Besides, the patent of anti-vibration for SSD ensures system reliability and stability.
